1 INTRODUCTION, SCOPE AND PURPOSE OF THIS DOCUMENT

Trade Capital Holding (TCH) Ltd (“**TCH**”, the “**Holding Company**” or the “**Group**”) is a Union Parent Investment Holding Company, incorporated in Cyprus as a private limited liability Company under the provisions of the Cyprus Companies Law, Cap. 113. TCH is a well-established group with global reach, catering for the needs of professional and retail clients worldwide, by providing strong liquidity and secure access to trading platforms and investment products based on cutting edge technology and innovation. The LEI Code of the Holding Company is 213800VCOOW1LBRSEA67. The Group’s head office is located at 148, Strovolos Avenue, first floor, CY 2048, Nicosia, Cyprus.

TCH acts as a holding company for investment firms authorized and regulated by the national competent authorities in their respective countries of incorporation. The investment firms whose consolidating entity is TCH are as follows:

- **Trade Capital Markets (TCM) Ltd:** Incorporated in Cyprus, authorized and regulated by the Cyprus Securities and Exchange Commission (“**CySEC**”) under license number 227/14 and by the Financial Sector Conduct Authority (“**FSCA**”) in South Africa as a foreign Financial Services Provider under license number 47857. The LEI Code of Trade Capital Markets (TCM) Ltd is 549300REMV7VLGS16J07;
- **Trade Capital UK (TCUK) Ltd:** Incorporated in the United Kingdom, authorized and regulated by the Financial Conduct Authority (“**FCA**”) under firm reference number 738538. The LEI Code of Trade Capital UK (TCUK) Ltd is 213800EZG5A39EG84M88;
- **Trade Capital Italia S.P.A:** Incorporated in Italy, authorized and regulated by the Commissione Nazionale per le Società e la Borsa (“**CONSOB**”) under license number 316. The LEI Code of Trade Capital Italia S.P.A is 984500BC07801C240566;
- **Trade Capital Markets (TCM) North America LLC:** Incorporated in the United States of America, authorized and regulated by the Financial Industry Regulatory Authority (“**FINRA**”) under central registration depository number 316822;
- **Lead Capital Global Ltd:** Incorporated in Mauritius, authorized and regulated by the Financial Services Commission of Mauritius (“**FSC**”) under license number C119023948. The LEI Code of Lead Capital Global Ltd is 213800BY3GSZV9IWBM32; and
- **Activotrade Valores, Agencia de Valores, S.A.:** Incorporated in Spain, authorized and regulated by the Comisión Nacional del Mercado de Valores (“**CNMV**”) under license number 239. The LEI Code of Activotrade Valores, Agencia de Valores, S.A. is 549300HC99YUUXMZT26.

The Group is focused on offering investment services to retail and professional clients through a “Business-to-Consumer” (“**B2C**”) business segment representing online trading via the respective websites of the investment firms under the Group structure.

In particular, TCH’s core operations entail offering to clients, through online trading platforms, complex financial instruments (“**Contracts for Difference**” or “**CFDs**”) on a number of underlying products such as Currencies, Commodities, Indices, Equities, ETFs, Bonds and Cryptocurrencies.

In addition to CFDs, via the investment firms under the Group’s structure, TCH offers customers a variety of products aimed to satisfy multiple diversification strategies, including real shares and exchange traded instruments via Direct Market Access (“**DMA**”) services and IPO offerings. It must be noted that the

offered products other than the CFDs are currently insignificant in terms of risk and volume towards the Group.

1.1 Regulatory Context

The Disclosure and Market Discipline Report (“**Pillar III Report**” or the “**Report**”) has been prepared in adherence to the new prudential framework which has been enforced since the 26th of June 2021 and which comprises of the following:

- Regulation (EU) 2019/2033 of the European Parliament and of the Council of 27th of November 2019 on the prudential requirements of investment firms and amending Regulations (EU) No. 1093/2010, (EU) No. 575/2013, (EU) No. 600/2014 and (EU) No. 806/2014 (“**IFR**”)
- Directive (EU) 2019/2034 of the European Parliament and of the Council of 27th of November 2019 on the prudential supervision of investment firms and amending Directives 2002/87/EC, 2009/65/EC, 2011/61/EU, 2013/36/EU, 2014/59/EU and 2014/65/EU (“**IFD**”), as this has been transposed into Cyprus legislation through the issuance of Law 165(I)/2021 for the Prudential Supervision of Investment Firms.

The IFR & IFD rules focus on specific methodologies that investment firms are required to apply for quantifying their exposure to risk and deriving their Capital Adequacy ratio, as well as to their required level of initial capital, their Internal Capital Adequacy & Risk Assessment Process, and the Liquidity Requirement, among others.

Disclosures cover the areas defined in Part Six of the IFR which include the contents depicted within Articles 46 to 53, to the extent applicable to the Group, and which are being presented within this Report.

The IFR in conjunction with the IFD are collectively referred to as the “IFR/IFD” within the scope of this Report.

Legislative regime:

- The IFR contains the prudential requirements for investment firms outlining specifically the regulatory approach for the calculation of the Group’s own funds, capital requirements and relevant applicable liquidity requirements, as well as characteristics of the Group’s corporate governance including the remuneration structure, investment policy and environmental, social and governance risks (“**ESG risks**”).
- The IFD transposes into domestic legislation the prudential supervision of investment firms.

The Report is updated and published annually with all disclosures included being made on a Consolidated basis. Furthermore, for the purposes of the Report, the 31st December 2023 is to be known as the “**reference date**”.

It is to be noted that under the IFR/IFD, investment firms must self-classify themselves into a class as per the requirements laid out in the aforementioned prudential framework, in order to be able to calculate

their own funds requirements. The Group has determined that it falls under the “Class 2” category of “all other investment firms”.

1.2 Pillar III Disclosure Policy

The below information provide a summary in regards to important aspects of this Report.

Information Disclosed

All disclosure requirements relating to this Report as denoted in Part Six of the IFR, including both quantitative and qualitative information, are met to a standard befitting to the Group’s particular characteristics and take into account its nature, the size, scope and complexity of its operations, as well as its internal organization.

Disclosure Currency

Unless stated otherwise, all amounts are in thousands of Euro (“€” or “EUR”).

Publication Frequency

All required disclosures within the Report are made on an annual basis in adherence to the Group’s obligations towards Part Six of the IFR and Article 44 of the IFD.

Publication Location

The Report is published on the Company’s websites www.tradecapitalmarkets.com and www.trade.com.

2 GOVERNANCE AND RISK MANAGEMENT OBJECTIVES AND POLICIES

2.1 The Board of Directors

The Group’s Board of Directors (the “BoD” or the “Board”) along with the Board and the Senior Management of each individual Investment Firm under consolidation is required, under Article 17(2) of the Investment Services and Activities and Regulated Markets Law of the Republic of Cyprus (the “**Law 87(I)/2017**”), as well as Article 25(1) of European Commission Delegated Regulation (EU) 2017/565 regarding organisational requirements and operating conditions for investment firms (“**Regulation 2017/565**”), to:

- Establish, implement and maintain adequate Risk Management Policies and procedures which identify the risks relating to each Company’s activities, processes and systems and set the level of risk tolerated by each Company;
- Adopt effective arrangements, processes and mechanisms to manage the risks relating to each Company’s activities, processes and systems, based on the acceptable level of risk tolerance; and
- Monitor the adequacy and effectiveness of such arrangements and to take necessary measures to address any deficiencies identified.

Furthermore, Paragraph 22 of Law 165(I)/2021 (hereinafter “**Law 165(I)/2021**”) for the Prudential Supervision of Investment Firms and Circular CI144-2014-23 with respect to the Supervisory Function, Governance Arrangements and Risk Management of Cyprus Investment Firms (“**CIFs**”), sets out the governance, control, reporting procedures and requirements that CIFs are required to implement with

respect to the treatment of risks. Most notably, Paragraph 6 of Law 165(I)/2021 stipulates that CIFs must ensure that the Board:

- Approves and periodically reviews the strategies and policies on the risk appetite of the CIF;
- Manages, monitors and mitigates the risks the CIF is or might be exposed to, taking into account the macroeconomic environment and the business cycle of the CIF; and
- Devotes sufficient time to the consideration of risk issues.

As at the reference date the Holding Company’s Board of Directors was constituted by one Director.

2.2 Diversity Policy for the Selection of Members of the Management Body

The Group acknowledges the importance of diversity in all levels of the corporate structure and the subsequent integral part it has in achieving commercial success. A balance of the plethora of factors including but not limited to age, skills, experience, background, race and gender are all instrumental in achieving any Group’s strategic plans and as such TCH is no exception by considering all abovementioned factors and striving to find an optimum composition.

In addition to seeking diversification through an individualistic approach, the Group is comprehensively committed to creating and maintaining an inclusive and collaborative workplace culture that will in turn provide sustainability for future endeavors.

2.3 Number of Directorships Held by Board Members

The following table, as at the reference date of 31st December 2023, depicts the amount of directorships held by each Member of the Board of the Holding Company.

Table 1: Position and number of directorships of the Board Members

Name	Position in TCH	Executive Directorships	Non-Executive Directorships
Roei Gavish	Director	1	-

Notes on Directorships:

- The information in this table is based only on representations made by the directors of the Holding Company.*
- Executive or non-executive directorships held within the same group shall count as a single directorship, as per the provisions of Section 9(5) of Law 87(I)/2017. Also, as per Section 9(6) of Law 87(I)/2017, directorships in organizations which do not pursue predominantly commercial objectives, such as non-profit-making or charitable organizations, are not taken into account for the purposes of the above table.*

2.4 Risk Management Policy

Functional risk management takes place on a Consolidated Group-wide basis, with the legal entity ensuring compliance with local regulatory requirements for risk management.

Risk organization and governance within the Group comprises of three main elements:

- Organizational Structure for effective risk management;
- Risk Standards which include policies, procedures and methodologies; and

- Risk Reporting.

Risk management at Group level is therefore depicted as follows:

Risk is prevalent and arises due to the business activities of each individual Investment Firm which is subject to consolidation. Subsequently as a response to the risk posed, a risk strategy has been implemented that aims to ensure substantial growth of the Group as a whole in combination with a moderate risk profile through the establishment of an effective risk management framework.

Each individual Investment Firm under consolidation has proceeded to establish, implement and maintain where deemed necessary, an Internal Procedures Manual (hereafter “IPM”), which includes all policies, procedures, regulations and mechanisms.

The Risk Management Policy of each individual Investment Firm is present within the constituted IPMs’ and it highlights the procedures and mechanisms that have been established in order to ensure that internal controls are set within each company in relation to appropriate measures in place in adherence to the notion of establishing an effective framework to manage risk. Moreover the Risk Management Policy includes the roles and duties of each Investment Firm’s Risk Manager and Compliance and Risk Management Committee, as well as reporting and internal control procedures in place.

The Group aims to follow a continuous, active and systematic risk management process of well-defined steps in order to understand, manage and communicate risks from a firm-wide perspective. This is achieved through the effective identification, assessment, treatment and reporting of internal and external risks.

2.5 Compliance and Risk Management Committee

Each individual Investment Firm which its nature, scale, complexity and organizational structure allows it, has established a Compliance and Risk Management Committee (the “Committee”) that acts independently. The Committee’s overall aim is to have in place a Risk Management and Governance Function on a per Company basis which is:

- Appropriate to the nature, scale, complexity, business and organizational structure of each Company under consolidation;
- Adequate to promote the sound and prudent management of each Investment Firm’s business; and
- Aimed at protecting the interests of clients and stakeholders.

The members of the Committee must have sufficient knowledge, skills and experience in order to fully understand and monitor the Risk Strategy, the Risk Appetite and the Risk Management Policies and practices of each of the Companies under consolidation.

The Committee in its entirety and irrespective of the Company in which it is established has the following duties and responsibilities:

- To continuously promote risk management ideals and appropriate risk management approaches to all departments of the Company;
- To review the Company's current and future Risk Appetite;
- To oversee the implementation of appropriate risk limits to effectively manage the different kinds of risks;
- To provide an overview of the Company's current risk management arrangements and identify any deficiencies with the purpose of establishing remedial procedures;
- To assess reports prepared by the Risk Management Function and recommend remedial procedures; and
- To collaborate in a harmonious fashion with all relevant departments with the sole purpose of managing risk and ensuring capital and liquidity levels are at satisfactory standings.

2.6 Risk Management Function

Each individual Investment Firm under consolidation where its nature, scale, complexity and organizational structure allows it, has established a Risk Management Function and to this effect has appointed a dedicated Risk Manager to implement the Company's Risk Management Policy. Furthermore, the Committee must conduct a duly and continuous supervision of the activities relating to the proper operation of the Risk Management Function and ensure that the said function identifies, measures, and reports all risks faced by the each Company.

The Risk Management Function of each individual Investment Firm has the following duties and responsibilities:

- To adopt prudent policies on risk management and internal control;
- To identify and evaluate all the fundamental risks faced by the Company;
- To implement remediation measures to the fundamental risks faced that arise due to the Company's operations in respect to the levels of risk tolerance;
- To provide adequate information in a timely and proper manner to the Committee on the status of risks and controls in place;
- To compile all required risk related reports and ensure distribution of the said reports to the various national competent authorities; and
- To conduct effectiveness reviews on the existing Risk Management Policies and internal control mechanisms and providing a report to the Committee.

The Risk Manager of each Company has direct access to each Company's Board.

Depending on the Investment Firm, both the CCO and the Risk Manager attend the Committee meetings as well as relevant employees from other departments.

2.7 Compliance and Money Laundering Compliance Functions

The Compliance Function of each Company under consolidation designs an annual risk-based plan that takes into consideration areas of acute importance, such as material business activity or Business and Regulatory risk, with the reasoning behind this being for each Company to consistently be regulatorily compliant.

The Compliance Function covers the areas of:

- Anti-Money Laundering and Financial Crime;
- Monitoring and Surveillance;
- Governance, Code of Conduct and Regulatory Compliance; and
- Regulatory Counselling.

The CCO and the Money Laundering Reporting Officer (“**MLRO**”) of each Company both have direct access to the Board.

2.8 Internal Audit Function

The Internal Audit Function’s main objectives include continuously monitoring and evaluating the Companies under consolidation on an individual basis by taking into consideration the nature, scale, and complexity of the business operations, as well as providing judicious advice, knowledge, and recommendations to ensure compliance with relevant legal and regulatory frameworks. The Internal Audit Function operates independently from other functions of each of the Companies within the Group.

The Internal Audit Function present within each Investment Firm, where deemed necessary, has the following duties and responsibilities:

- To establish, implement and maintain an audit plan which will aim to examine and evaluate whether the Company’s systems, internal control mechanisms and agreements are adequate and effective;
- To issue recommendations based on the evaluation of the audit plan’s examinations and subsequently assist the Board on the effectiveness of existing control arrangements;
- To verify compliance with any potential recommendations on matters including corporate governance and management;
- To provide an impartial and independent appraisal on all Company activities;
- To compile and distribute, in a timely and accurate manner, the Annual Internal Audit Report to the Board; and
- To ensure that relevant records are kept with respect to all internal audit activity conducted.

2.9 Risk Management Strategies and Objectives

The Group as a whole and each individual Investment Firm implements a plethora of Risk Management strategies in order to mitigate different types of risks, including metrics such as Key Risk Indicators (“**KRIs**”) and maximum tolerable exposure limits. A focal part of the Group’s capital & liquidity management strategy lies in the continuous monitoring of the Capital Adequacy Ratio and the amount of its held Liquid Assets and the assurance that the said ratio will be in exceedance of the regulatory minimum benchmark.

Management of the Group's capital & liquidity structure and any adjustments made are performed in accordance with the following objectives:

- To maintain financial solidity while respecting predetermined risk appetite targets;
- To preserve existing levels of financial flexibility, capital and liquidity to cultivate organic growth;
- To adequately allocate capital among the various business lines according to strategic objectives;
- To ensure the Group's resilience in stress scenario events whilst managing concentration to counterparties; and
- To meet the expectations of stakeholders including but not limited to debt and equity investors, External Credit Assessment Institutions ("ECAIs") and shareholders.

2.10 Internal Capital Adequacy and Risk Assessment Report

The ICARA is decomposed into the Internal Capital Adequacy Assessment Process ("ICAAP") and the Internal Liquidity Adequacy Assessment Process ("ILAAP"), with the former focusing on having sufficient capital in terms of the risks faced and the latter focusing on the applicable Liquidity risks. Both components simulate conditions in the present, as well as on a forward-looking basis for the next three years.

The purpose of the ICARA is for the Risk Manager, who ultimately has the responsibility to generate, maintain and review the Report, to inform the Board of Directors on the assessment and quantification of the required internal capital and liquid assets, the employed methodologies to mitigate and manage identified risks, and the current and future required capital that is necessary to cover the risks for which there is current exposure, or the risks there potentially be exposure to in the future.

2.11 Board Risk Appetite & Risk Acknowledgement Statement

The Risk Appetite Statement as dictated by the Board, indicates the level of risk that the Group is prepared to incur given its strategic and business objectives. The Risk Appetite Statement is defined using both qualitative and quantitative parameters and highlights the conditions by which the each individual Investment Firm under consolidation can operate under varying levels of singular or aggregated risks, by taking into consideration extreme conditions, events and outcomes. Moreover, risk appetite should reflect potential impact on earnings, capital and funding/liquidity.

The following risks have been highlighted by the Board as being of paramount importance and to this effect each individual Company, where deemed applicable, has established internal controls to manage them:

- Credit Risk
- Operational Risk
- Concentration Risk
- Liquidity Risk
- Compliance/Regulatory Risk
- Reputational Risk

For the aforementioned main risk types the Group is exposed to, suitable controls and mitigation strategies are in place should an adverse situation take place. The overall risk appetite of the Group, being

described as medium-low risk, is reflected in the attempts to engage in low risk activities, with risks being mitigated wherever possible in conjunction with comparing the actual mitigation costs which should not exceed the actual or potential risk being taken. All risks of any significance are identified, assessed and controlled on an ongoing basis.

2.12 Levels of Defense

The Group’s overall governance, system, and control framework is deployed on the basis of the three levels of defense model which distinguishes among:

- **First Level:** Functions that own and manage risks – Business Management and Operational Functions.
- **Second Level:** Functions that oversee risks – Compliance and Risk Management Functions.
- **Third Level:** Functions that provide independent assurance – Internal and External Audit Functions.

3 CAPITAL MANAGEMENT AND ADEQUACY

3.1 Capital Management

The Group, according to the capital and liquidity thresholds defined with IFR/IFD, must have in place systems, procedures and controls to:

- Identify, monitor and if possible, to reduce risks that may result from ongoing operations, or from winding-down of the Group; and
- Assess whether there is a need to hold additional own funds and/or liquid assets as a result of prevailing risks.

As a response to the capital thresholds, the Group has set its Own Funds Threshold Requirement (“**OFTR**”) to be the higher of the following:

- Permanent Minimum Capital Requirement (“**PMCR**”).
- Own funds necessary to mitigate the risk of harm from ongoing operations, whilst taking into consideration periods of financial stress.
- Own funds necessary to ensure that the Group can be wound down in an orderly manner.

The Capital Adequacy Ratio (“**CAR**”) that the Group is subject to and must pertain at all times should be in excess of 100%, which is decomposed as follows:

Table 2: Minimum required capital ratio thresholds

Type of Capital	Minimum Required Threshold
Common Equity Tier 1 Ratio	56%
Tier 1 Ratio	75%
Total Own Funds Ratio (CAR)	100%

As at the reference date of 31st December 2023, the composition of the Group's Own Funds on a consolidated basis is depicted in the following table:

Table 3: Template EU IF CC1.01 - Composition of Regulatory Own Funds

31 st December 2023		(a)	(b)
		Amounts (EUR'000)	Source based on reference numbers/letters of the Balance Sheet in the Financial Statements (cross reference to EU IF CC2)
Reference	Common Equity Tier 1 (CET 1) capital: instruments and reserves		
1	OWN FUNDS	7.527	
2	TIER 1 CAPITAL	7.527	
3	COMMON EQUITY TIER 1 CAPITAL	7.527	
4	Fully paid up capital instruments	3	Reference 1 (Shareholder's Equity)
5	Share premium	9.255	Reference 2 (Shareholder's Equity)
6	Retained earnings	2.844	Reference 3 (Shareholder's Equity)
10	Adjustments to CET1 due to prudential filters	(6)	
17	Losses for the current financial year	(597)	
18	(-) Goodwill	(3.728)	
19	(-) Other intangible assets	(4)	
26	(-) Other deductions	(140)	
27	CET1: Other capital elements, deductions and adjustments	(100)	Reference 1 & 2 (Assets)
28	ADDITIONAL TIER 1 CAPITAL	-	
40	TIER 2 CAPITAL	-	

As at the reference date of 31st December 2023, the composition of the Group's assets and liabilities structure reconciled with the regulatory Own Funds is depicted in the following table:

Table 4: Template EU IF CC2 - Own Funds: Reconciliation of Regulatory Own Funds to Balance Sheet in the Financial Statements

Balance Sheet as in Financial Statements		(a)	(c)
		31 st December 2023 Amounts (EUR'000)	Cross Reference to EU IF CC1
Reference	Assets - Breakdown by asset classes according to Balance Sheet in Financial Statements		
1	Trade and other receivables (non-current assets) (Investors Compensation Fund Contribution)	41	Reference 27
2	Cash and cash receivables (ICF Buffer)	59	Reference 27
3	Non-current assets (other)	5.088	
4	Current assets (other)	9.480	
	Total Assets	14.668	
Reference	Liabilities - Breakdown by liability classes according to Balance Sheet in Financial Statements		
1	Non-current liabilities	-	

2	Current liabilities	3.316	
	Total Liabilities	3.316	
Reference	Shareholder's Equity - Breakdown by equity classes according to Balance Sheet in Financial Statements		
1	Share capital	3	Reference 4
2	Share premium	9.255	Reference 5
3	Retained earnings	2.844	Reference 6
	Total Shareholders' Equity	12.102	

The Group recorded a Capital Adequacy Ratio of 233.40% which is in excess of the regulatory minimum of 100%, and the Group's eligible capital is solely comprised of CET1 Capital.

Table 5: Capital Excess/Ratio, in EUR'000

	Fully-phased in	Reference
Capital		
Common Equity Tier 1	7.527	
Additional Tier 1	-	
Tier 2	-

Minimum Own Funds Requirement	3.225	e = (higher of b, c, d)
Capital Excess/Ratio		
Capital Excess	2.241	a-e
Capital Ratio	233.40%	a/e

3.2 Liquidity Adequacy

The Group has set its Liquid Assets Threshold Requirement ("LATR") to be the sum of the Basic Liquid Assets Requirement ("BLAR") and the higher of the following:

- Additional liquid assets necessary to fund ongoing operations, whilst taking into consideration periods of financial stress.
- Additional liquid assets necessary to ensure that the Group can begin an orderly wind-down, taking into consideration liquid asset inflows that can be reasonably expected to occur during the wind-down period.

In addition, the Group's Liquid Assets must exceed at all times the BLAR, ensuring that sufficient resources are in place should an adverse situation occur.

It is understood that the Group must always ensure adequate liquidity set out in the specific liquidity requirements with liquid assets as set out in Article 43 of IFR.

The following table provides an overview of the Liquid Assets the Group held as at the reference date in relation to the Liquidity Requirement. As shown, the Group maintained Liquid Assets in excess of the Liquidity Requirement as at year-end.

Table 6: Liquid Assets, in EUR'000

Liquidity	Amount
Liquid Assets	2.629
Liquidity Requirement	1.051

3.3 Own Funds Threshold Requirement

As aforementioned, the Group has determined that it falls under the “Class 2” category of “all other investment firms”, and as such is obliged to calculate its OFTR as the highest of its PMCR, Fixed Overheads Requirement (“FOR”) and K-Factors Requirement (“KFR”):

3.3.1 Permanent Minimum Capital Requirement

The PMCR on a Consolidated level is calculated according to the application of Article 10 of the Draft Commission Delegated Regulation with regards to Regulatory Technical Standards on prudential consolidation of investment firm groups EBA/CP/2020/06, which stipulates that the Consolidated PMCR shall be the sum of the PMCR at the individual level of all Group undertakings that are fully Consolidated.

The PMCR of Group undertakings established in third countries shall be the PMCR applicable had they been authorized within the European Union.

3.3.2 Fixed Overheads Requirement

The Group has to take into consideration the FOR, which is calculated annually based on the latest financial statements, with the required amount being derived as being one quarter of the annual fixed overheads of the previous year after the distribution of profits, with the relevant figures being presented in the following table:

Table 7: FOR in EUR'000

Metric	Amount
Gross Fixed Overhead Expenses	25.018
(-) Total Deductions	(12.402)
Annual Fixed Overheads of the previous year after distribution of profits	12.616
Fixed Overheads Requirement	3.154

3.3.3 K-Factors Requirement

The K-Factors Requirement replace Credit risk, Market risk and Operational risk for Class 2 investment firms, for the determination of the capital required to meet the risks faced. The total capital requirement emanating from the K-Factors is the sum of the Risk-to-Clients (“RtC”), Risk-to-Markets (“RtM”) and Risk-to-Firm (“RtF”) metrics.

The following table outlines the Group’s KFRs on a consolidated basis as at the reference date, decomposed into their respective capital requirements as at the reference date:

Table 8: KFR in EUR'000

	Metric	31 st December 2023	
		Factor Amount	K-Factor Requirement
RtC	AUM	43.373	9
	CMH	14.913	60
	ASA	-	-
	COH	-	-
	Total RtC	-	69
RtM	NPR	-	63
	Total RtM	-	63
RtF	TCD	-	489
	DTF (derivative trades)	122.284	12
	CON	-	-
	Total RtF	-	501
Total K-Factors		-	633

3.3.3.1 Risk-to-Clients (RtC)

RtC metrics cover the full spectrum of different MiFID services of the way investment firms service clients and by definition is the most important metric as it captures the risk of potential harm posed by investment firms to clients. RtC is defined as the sum of client Assets Under Management (“AUM”), Client Money Held (“CMH”), Assets Safeguarded and Administered (“ASA”) and Client Orders Handled (“COH”), multiplied by relevant coefficients per K-Factor.

Each individual Company within the Group is required to calculate the following applicable K-Factors pertinent to RtC:

- **AUM:** Captures the risk of harm to clients from mis-management of client portfolios or poor execution and provides reassurance to clients in terms of the continuity of service of portfolio management and ongoing investment advice.
- **CMH:** Captures the risk of harm to client money safeguarded by the investment firm taking into account the legal arrangements in relation to asset segregation. Risk to clients may arise in the event of bankruptcy, insolvency, or entry into resolution or administration of the investment firm.

- **ASA:** Captures the risk of harm to client financial instruments or assets safeguarded by the investment firm and ensures that investment firms hold capital in proportion to such balances, regardless of whether they are on their own balance sheet or in third-party accounts. Due to the nature of CFD products, ASA does not apply to the Group and the safeguarding of clients' positions in CFD products is captured under K-CMH.
- **COH:** Captures the risk of harm to clients of the investment firm which executes orders as part of execution-only services to clients, or when an investment firm is part of a chain for client orders. Due to the applicable Companies executing clients orders in their own name whilst acting as principal to client trades, means that COH does not apply to the Group and such a risk is captured under K-DTF.

The Rolling Average Approach is used for calculating capital requirements regarding AUM, CMH, ASA and COH as presented within the IFR/IFD.

Risk Policy and Management Tools

Policies and procedures are in place by the Investment Firms under consolidation to ensure that K-Factor data are accessible and available at all times. In addition, data pertinent to RtC is collected on a daily and monthly basis, depending on the applicable proxy, for monitoring purposes. Should it be deemed that the Group's capital adequacy position is threatened then appropriate actions will be taken.

The Group's overall RtC position is at an acceptable level, with the capital charges associated with the proxies being at low levels, and with the following risk mitigation practices being employed:

In regards to AUM, the applicable entities ensure that the Portfolio Management department is adequately staffed with competent personnel that satisfy all of the Commission's requirements in terms of skill, knowledge and experience. Moreover, all strategies are back-tested, clients are allowed to enter their own stop loss values and are duly notified if drawdown percentages exceed the 10% benchmark.

In regards to CMH, the Group holds client funds in segregated accounts, separate from company funds. In addition, the entities within the Group cooperate with credit institutions that are of sound reputation and that are accredited by ECAIs. Moreover, funds are diversified amongst the aforementioned institutions to mitigate Concentration risk, and daily reconciliations are performed and recorded in an adequate fashion.

In regards to the RtC metric as a whole, the companies within the Group offer Negative Balance Protection ("**NBP**") to their clients, meaning that they are protected in exceptional market conditions where there is a price change in the underlying that is sufficiently large and sudden, and which results in clients having a negative account value. This means that client losses are limited to the total funds that are in the clients' trading account.

3.3.3.2 Risk-to-Market (RtM)

RtM metrics apply to all trading book positions, which include in particular positions in debt instruments, equity instruments, collective investment undertakings, foreign exchange and gold, and commodities. RtM is comprised of Net Position Risk ("**NPR**") and Clearing Margin Given ("**CMG**"). Non-trading book positions must also be included, where these give rise to Foreign Exchange Risk or Commodity Risk. During

2023, this was only applicable to the Group in relation to its Market FX risk exposure arising from its Balance Sheet assets and liabilities that were denominated and funded in a currency other than its reporting currency (i.e., EUR). As at the reporting date the currencies to which the Company has the highest exposure due to its reporting currency, are the USD and GBP. The foreign exchange risk is considered as low.

The default methodology to calculate RtM is using NPR, with NPR capturing the risk that is attributed to a change in value of financial instruments that arise from factors including market fluctuations and instrument-specific parameters such as volatility and correlations. The Company applies the Standardized Approach in calculating the NPR, as this is specified within EU Regulation 575/2013 (the “**Capital Requirements Regulation**” or “**CRR**”) for Market Risk exposures.

The Standardized Approach is used in calculating the NPR.

Risk Policy and Management Tools:

Policies and procedures are in place by the entities within the Group to ensure that K-Factor data are accessible and available at all times. In addition, data pertinent to RtM is collected on monthly basis, from the Group’s generated financial statements in respect to non-trading book NPR.

Trading book NPR is not present, as the applicable entities under consolidation employ the Matched Principal execution model where both sides of financial instrument transactions are being executed simultaneously thus mitigating trading book NPR emanating from clients’ open positions. Should it be deemed that the Group’s capital adequacy position is threatened then appropriate actions will be taken.

3.3.3.3 Risk-to-Firm (RtF)

RtF metrics capture the risk of Trading Counterparty Default (“**TCD**”), Concentration risk for trading book exposures to counterparties (“**CON**”) and Operational risks from Daily Trading Flow (“**DTF**”). RtF is defined as the sum of TCD, CON and DTF.

Each individual entity within the Group is required to calculate the following applicable K-Factors pertinent to RtF:

- **TCD:** Captures the risk of harm to the investment firm by counterparties to over-the-counter derivatives, repurchase transactions, securities and commodities lending or borrowing transactions, long settlement transactions, margin lending transactions or any other securities financing transactions. In addition, TCD captures the additional risk posed by recipients of loans granted by the investment firm on an ancillary basis as part of an investment service that fail to fulfil their obligations.
- **CON:** Captures the risk of harm to the investment firm by counterparties, including issuers of instruments in which the firm maintains positions, where the exposure values are derived from the summation of TCD and NPR on a transaction level, with a capital charge being enforced only when the maximum allowable limit as determined in relation to the investment firm’s own funds, is exceeded. Due to the applicable entities under consolidation applying the Matched Principal execution model, the NPR exposures, which are calculated on a net notional amount basis per issuer of instrument, as relevant, do not affect the CON calculations. As at the reference date, the

Group's TCD exposures towards its clients, affiliate and issuers of equity and interest-rate instruments in the trading book do not exceed the Group's capital thresholds as these are prescribed in Article 37 of IFR.

- **DTF:** Captures the risk of harm to the investment firm in the form of Operational risk due to large volumes of trades concluded for its own account or for clients in its own name in one day which could result from inadequate or failed internal processes, people and systems or from external events.

The Group calculates TCD by multiplying the value of the exposures, based on replacement cost and an add-on for potential future exposure, by risk factors, accounting for mitigating effects of effective netting and the exchange of collateral.

CON is calculated by taking into consideration the exposure value, the own funds requirement of the total exposure, the exposure value excess, the maximum allowable limit, the duration of the excess and the counterparty type. A capital charge shall be applied only upon a breach by a counterparty of the maximum allowable limit, with the capital charge defined as the Own Funds Requirement for the Excess ("**OFRE**").

The Rolling Average Approach is used for calculating capital requirements regarding DTF as presented within the IFR/IFD.

Risk Policy and Management Tools:

Policies and procedures are in place by the entities within the Group to ensure that K-Factor data are accessible and available at all times. In addition, data pertinent to RtF is collected on a daily and monthly basis, depending on the applicable proxy, for monitoring purposes. Should it be deemed that the Group's capital adequacy position is threatened then appropriate actions will be taken.

The Group's overall RtF position is at an acceptable level, with the capital charges associated with the proxies being at relatively high levels in comparison with the metrics of RtC and RtM, mainly due to the influence of each applicable entity's trading book, and with the following risk mitigation practices being used:

In regards to TCD, the Group utilises client used margin as collateral in order to counteract the exposure value and ensure that the TCD metric is adequately managed.

In regards to DTF, applicable entities under consolidation perform best execution monitoring to determine if client orders have suffered due to poor execution, with metrics taken into consideration including but not limited to likelihood of execution, slippage and speed of execution. Such monitoring is documented in monthly reports to the applicable entity's Senior Management and remediation actions take place to improve execution metrics if deemed necessary.

3.4 Other Material Risks

3.4.1 Operational Risk other than DTF

Operational risk is the risk of loss corresponding to inadequacies or failures in internal procedures and external events, system failures or delays and people. In addition, Operational risk arises from Accounting, Environmental, Legal, Fraud and Physical risks. The Company is partially dependent on third parties for the provision of key technological systems, infrastructure and data.

Risk Policy and Management Tools

The Group has developed processes, management tools and a control infrastructure in order to enhance and mitigate Operational risks that are inherent in the conducted activities. Technology and the dependence of the Group on it plays a paramount role in the establishment and maintenance of the appropriate governance framework. Where possible the Group has the technology and expertise to mitigate the risk should a technology counterparty experience a failure and multiple providers are utilized in a failover scheme.

Several Operational risk reporting, monitoring and mitigating actions have been established by the Companies within the Group and include:

- KRIs being used to quantify potential operational risks, where such said KRIs are constantly being refined to adhere to the adaptive nature that risks pose;
- Using systems to automate processes and controls to eliminate risk from human error;
- Offering ongoing training to employees to reduce the likelihood of human error arising from lack of expertise;
- Maintaining an Incident and Risk Report registry whereby all operational risk-oriented events are catalogued and evaluated;
- Maintaining a Risk Register; and
- Maintaining a Complaints Handling registry to monitor arising complaints.

Moreover applicable entities under consolidation have developed a Business Continuity and Disaster Recovery Plan (“**BC/DR Plan**”), with the its construction being on the basis that each Company within the Group acknowledges that due to the nature, size and complexity of its business and organizational structure, that it is exposed to a wide range of potential hazards that could disrupt business operations.

A major component of Operational risk is Technology risk. Technology risk is the risk of loss, disruption or damage to a reputation of an organization resulting from the failure of its information technology systems. The effective operation of each Group entity is dependent on technology and advanced information systems, the ability to provide clients with reliable, real-time access to its systems is fundamental to the success of the business. This dependency on technology exposes the Group to a major risk in the unlikely, but possible, event that the systems are disabled for a short period of time and possibly for an even longer period of time.

Extensive work is conducted by the Group in relation to the EBA Guidelines on Information and Communication Technology and Security Risks Management, EBA/GL/2019/04 (the “**EBA Guidelines**”).

3.4.2 Concentration Risk

Concentration risk is defined as having any exposure to a single client or group of clients, which may result in losses that are sizeable enough to threaten the Group's ability to maintain its core operations or result in a material change in its risk profile. Credit Concentration risk, refers to disproportionately large risk exposure to specific Credit risks emanating from counterparties, with Credit risk being defined as the risk of loss that is attributed to a counterparty's default or the inability of a counterparty to fulfill in full its financial obligations towards the Group.

Risk Policy and Management Tools

The Group's Credit Concentration risk mainly arises from counterparties such as financial institutions where the entities under consolidation hold its assets and funds, from debtors and also from clients.

Prior to commencing with trading, client accounts must hold enough equity in order to maintain the necessary margin requirements due to the leveraged trading facility offered. Moreover any profits and losses amassed by clients are either credited or debited to their account instantaneously.

The Group enforces Credit Risk Mitigation ("CRM") Strategies in order to minimize the probability of loss arising from credit risk. Examples of CRM Strategies include:

- Holding all client funds in segregated accounts, separate from the company funds;
- Cooperating with EU credit institutions that are highly rated by accredited ECAs for the purpose of safekeeping of both company and client funds;
- Diversification of funds throughout several credit institutions to mitigate Concentration risk;
- Monitoring of the Group's exposure to a single counterparty by managing the large exposure in the banking book metric;
- Exercising margin calls and liquidation of open positions when the market moves against the clients to prevent accounts going into deficit; and
- Setting limits at client level to ensure that clients can reach a pre-determined portfolio size.

Counterparties that are present in the course of the Group's general trading business, include regulated investment firms. Such counterparties are classified as the Company's liquidity providers or execution venues, which are the second leg of execution in the Matched Principal execution model, where the Company transmits order for execution. Policies and procedures are in place to constantly monitor the execution quality as well as the financial position of such counterparties.

Concentration of clients in various jurisdictions is also mitigated from the use of advertising and marketing in order to diversify clients based on their country of residence.

3.4.3 Liquidity Risk

Liquidity risk is the risk of loss corresponding to the Group's inability to meet its cash or collateral requirements as they arise, at a reasonable cost. The primary objective in managing Liquidity risk is to ensure that the funding of activities is performed in the most cost-effective way while adhering to regulatory constraints. Funding Liquidity risk is when there are insufficient liquid assets to repay liabilities under normal and stressed market conditions.

Risk Policy and Management Tools

The principles and standards applicable to the management of Liquidity risk are defined by the established liquidity tolerance level as part of the Group's risk appetite. Furthermore regular analysis and reporting of Liquidity risk is conducted, along with diversification practises to reduce Concentration risk and prudent cash management is implemented.

Subject to the provisions of Directive DI87-01 of CySEC for the safeguarding of financial instruments and funds belonging to clients, the applicable entities under consolidation are exposed to Liquidity risk with respect to the accounts that client funds are kept. Extreme market conditions may lead to multiple counterparties failing. Client funds are held in segregated accounts, clearly separated from each individual company's funds.

Daily reconciliations are conducted to review each individual company's equity versus clients' equity and day-to-day cashflow is assessed under different scenarios. In addition, under the IFR/IFD framework the Group must hold liquid assets exceeding one third of the FOR at all times.

3.4.4 Compliance/Regulatory Risk

Compliance/Regulatory risk is the risk of loss corresponding from legal, administrative or disciplinary sanctions, or from the failure to comply with the provisions governing the Group's activities. Compliance/Regulatory risk emanates from legal or regulatory changes that may be imposed by regulatory or supervisory bodies that could potentially have an adverse effect on the Group's financial position.

Risk Policy and Management Tools

The entities within the Group, being licensed investment firms, entails that they are regulated and supervised in the conduct of their business by the relevant national competent authorities. Furthermore the Group ensures the entities under consolidation act in the highest levels of compliance at all times in accordance with all applicable regulatory stipulations and it strives to operate in a professional, ethical and honest manner to ensure that the Group's reputation is intact as well as that all counterparties, employees and clients are protected.

The Group employs several risk mitigating strategies in order to manage Compliance/Regulatory risk, including keeping abreast with regulatory developments, participating in material regulatory consultations, aiming to anticipate regulatory issues and providing necessary and relevant advice to the Board of Directors on an ongoing basis. The Risk Management and Compliance Departments of the applicable entities under consolidation continuously monitor issued notifications by regulatory authorities.

The Group has adequate internal procedures and policies implemented, and regular reviews are being conducted by the Internal Auditors of each individual entity under consolidation. The Group's structure promotes clear coordination of duties, and the Senior Management consists of individuals who have suitable professional experience, ethos and integrity.

In respect to the implications of Negative Balance Protection risk, the Group though it does not have contractual agreements with counterparties belonging to non-equivalent third countries, has in place all necessary arrangements to comply with the minimum additional capital buffer.

Stringent Know Your Customer (“KYC”) policies and procedures are in place to ensure that high ethical and professional standards are promoted to ensure that the entities within the Group are not being used intentionally or unintentionally by criminal elements. Key elements of the Group’s KYC program include customer identification and ongoing monitoring of high risk accounts.

3.4.5 Reputational Risk

Reputational risk is the risk of loss should an incident urge the Group’s counterparties, investors, regulators or clients to adopt an adverse perception about the Group or any entity within the Group and its image. It may also occur as an effect of poor customer service or from potential fines or sanctions imposed by a regulator, due to the loss of a key director, the loss of large pool of clients, fraud or theft, client complaints which result in claims, legal actions against the Company and from negative publicity relating to the overall Group’s operations.

Risk Policy and Management Tools

Potential adverse situations which may give rise to Reputational risk may be inadequate arrangements for negative balance protection to clients which may lead to the aforementioned party having to sustain losses. Such outcomes are mitigated by constant monitoring of clients who have negative balance and where the entities under consolidation proceed to balance their accounts to zero, thus ensuring that clients do not lose more than they have deposited with the Group.

In regards to public disclosures, the Group ensures that all policies that need to be disclosed are done in a timely and compliant manner, abiding by all applicable regulatory frameworks. All applicable public disclosures per entity under consolidation including but not limited to the “Disclosure and Market Discipline Report”, the “Order Execution Policy” and the best execution disclosures such as the “Execution Quality Summary Statement”, as well as the “Key Information Documents” are written in an as easily understandable way as possible so each client can clearly understand the content of each document, in an attempt of the Group to be as transparent as possible and to be beyond reproach against any disputes towards its reputation.

Policies and procedures are in place within the Group to create a strong internal control system to minimize Reputational risk. All of the employees within the entities under consolidation are adequately trained and equipped with the necessary knowledge and skills to fulfill their duties.

3.4.6 Business/Strategic Risk

Business risk arises from probable losses that might be incurred by the Group during unfavorable market conditions, thus having a current and potential future impact on earnings or capital from adverse business decisions, or lack of responses to industry changes by the entities under consolidation in their conduct of business.

Strategic risk is the result of adverse business decisions, improper implementation of decisions or lack of responsiveness to changes in the business environment. The Board of Directors is responsible for setting the strategy the Group is to abide by, while the Senior Management of all entities is responsible for the implementation of the aforementioned strategy. Most importantly, there should be no discrepancy between the Board's and Senior Management's interests.

Risk Policy and Management Tools

Business/Strategic risk may cause a deterioration of the Group's business and may affect the economic conditions in the markets in which it operates. Prudent and adequate business planning is effectuated to allow the Group to expand its client base and grow its revenue and profitability. Such risks have been taken into consideration when preparing the financial projections and when conducting the stress tests.

A continuous evaluation of the business plans is being undertaken to avoid potential damage to the Group's financial position due to the everchanging economic conditions.

Policies and procedures are in place to deal with potential client complaints, with such procedures being documented in the IPM of the applicable entities, and are disclosed to clients and potential clients via the relevant websites. Due to the nature of services offered, the probability of having client complaints is high, which results in Legal risk being present, despite the Group in its entirety doing its best to offer high quality services to its clients.

3.4.7 Conduct Risk

Conduct risk is the risk of loss due to an action by an individual, by a financial institution or by an industry as a whole, which may lead to client detriment or undermining of market integrity. Consequently, Conduct risk is attributed as the current or prospective losses to an entity arising from an inappropriate supply of financial services including cases of willful or negligent misconduct.

Risk Policy and Management Tools

The Group has established adequate negative balance arrangements to protect its clients from realizing heavy losses should the market move against them. Moreover, policies and procedures are in place by the individual entities to diversify their liquidity providers and monitor their financial soundness on an ongoing basis.

The Group has taken all reasonable steps to identify conditions which might lead to conflicts of interest between the entities themselves and the employees, or between the entities and their clients during the course of the provision of investment and ancillary services.

4 REMUNERATION

The remuneration system that is implemented by the Group is applied on an Investment Firm basis and incorporates elements such as fixed remuneration, variable remuneration and other benefits such as bonuses that an employee or executive receives during employment taking into consideration the provisions stipulated in Law 87(I)/2017. Where applicable, severance payment also constitutes

remuneration as well. The remuneration levels applied and practiced are appropriate to the Group's size, internal organization, nature, scope and complexity of pertained activities.

Each individual Company under consolidation, where deemed necessary, has established a Remuneration Policy which applies to all employees, service providers and affiliates, with the Board of Directors having the overall responsibility to implement, monitor and review the said policy and with Senior Management ensuring that all persons remunerated have knowledge of and understand the Remuneration Policy. The said policy's philosophy is to promote sound and effective risk management, as well as long-term perspective by discouraging excessive risk-taking by employees and external business partners, as well as providing sufficient incentives for personnel to achieve the Group's business targets. Furthermore the Remuneration Policy has been constructed in a way that promotes an appropriate code of conduct that ensures avoidance of potential conflicts of interest that may negatively impact the Group as well as its clients.

The Group is committed to base its remuneration practices on a gender neutral approach, thus mitigating any potential for there to be a gender pay gap. This notion is prevalent on a Group-wide basis and does not only include Senior Management, Executive and Non-Executive Directors and Other Staff.

The two main remuneration structures incorporated by the Group on an individual level for all Investment Firms under consolidation within the established remuneration system, are the fixed and variable remuneration types.

Fixed Remuneration

The remuneration system consisting of fixed remuneration, is structured on the basis of employee compensation being attributed to metrics such as skills, experience and competencies that are commensurate with the requirements, size and scope of the position. Remuneration is aimed to be competitive to attract and retain employees as well as giving the Company the capability to achieve its strategic objectives.

Fixed remuneration is payable to employees in fixed monthly instalments.

Variable Remuneration

The remuneration system consisting of variable remuneration, is predicated on the industry objective of retaining cost flexibility while attracting and retaining employees. It has the advantage of being able to differentiate performance outcomes and drive behaviours through appropriate incentive systems that can also positively influence culture.

The Group's variable remuneration system availability is bifurcated in the following categories:

- To all employees by means of a performance related bonus.
- To employees of certain departments via commissions on client deposits and/or spreads.

This remuneration system reflects sustainable and risk adjusted performance as well as performance in excess of what is required to fulfil the employee's job description as part of the terms of employment, and does not exceed 100% of the fixed component of the total compensation for each individual.

Aggregated Quantitative Information

The existing remuneration system utilised is concerned with practices relating to categories of members of staff whose professional activities have a material impact on the Group's risk profile, such as the Senior Management and Other Staff.

The following table, serves to disclose the remuneration of the aforementioned parties within 2023, whilst segregating the remuneration figures into fixed and variable, with a clear indication of the number of individuals constituting each classification category.

In adherence to Article 30(2) of the IFD, the Group ensures that appropriate ratios are in place between Fixed and Variable remuneration per classification type, taking into consideration the existing business activities and present risks.

Table 9: Accumulated Remuneration per Classification Type, in EUR'000

Classification	Number of Persons	Fixed	Variable*	Total Remuneration	Ratio between Fixed and Variable Remuneration
Senior Management**	7	438	41	479	10:1
Other Staff***	19	870	156	1.026	5:1
Overall	26	1.308	197	1.505	6:1

Notes on Remuneration:

* The entirety of variable remuneration consisted of cash payments.

** The Senior Management category includes the Directors from Group entities.

*** The Other Staff category includes the control functions and other material risk takers from the Group entities, as well as individuals who satisfy Article 4(1)(c) of Commission Delegated Regulation (EU) 2021/2154.

Further to the above, TCH discloses the following in regards to its remuneration practices:

- No amounts of deferred remuneration have been awarded for previous performance periods that are due to vest in the 2023 financial year, or due to vest in subsequent years.
- No amounts of deferred remuneration is due to vest in the 2023 financial year that is paid during the financial year and that is reduced through performance adjustments.
- There is no guaranteed variable remuneration of any form.
- No severance payments have been awarded in previous years that have been paid out during the 2023 financial year.
- No severance payments have been awarded during the 2023 financial year.

5 APPENDIX – OWN FUNDS MAIN FEATURES

Table 10: Template EU IF CCA: Own Funds: Main Features of Own Instruments Issued by the Firm

Description of Main Features of Own Funds instruments		(a)
		Common Equity Tier 1 Capital
Reference		
1	Issuer	Trade Capital Holding (TCH) Ltd
2	Unique identifier (e.g. CUSIP, ISIN or Bloomberg identifier for private placement)	N/A
3	Public or private placement	Private
4	Governing law(s) of the instrument	Cyprus Law
5	Instrument type (types to be specified by each jurisdiction)	Ordinary Shares
6	Amount recognised in regulatory capital (Currency in million, as of most recent reporting date)	3,000
7	Nominal amount of instrument	1
8	Issue price	EUR 1.000
9	Redemption price	N/A
10	Accounting classification	Shareholder's Equity
11	Original date of issuance	31/01/2020
12	Perpetual or dated	Perpetual
13	Original maturity date	No maturity
14	Issuer call subject to prior supervisory approval	N/A
15	Optional call date, contingent call dates and redemption amount	N/A
16	Subsequent call dates, if applicable	N/A
	<i>Coupons / dividends</i>	
17	Fixed or floating dividend/coupon	Floating
18	Coupon rate and any related index	N/A
19	Existence of a dividend stopper	No
20	Fully discretionary, partially discretionary or mandatory (in terms of timing)	N/A
21	Fully discretionary, partially discretionary or mandatory (in terms of amount)	N/A
22	Existence of step up or other incentive to redeem	No
23	Noncumulative or cumulative	Non-cumulative
24	Convertible or non-convertible	Non-convertible
25	If convertible, conversion trigger(s)	N/A
26	If convertible, fully or partially	N/A
27	If convertible, conversion rate	N/A
28	If convertible, mandatory or optional conversion	N/A
29	If convertible, specify instrument type convertible into	N/A
30	If convertible, specify issuer of instrument it converts into	N/A
31	Write-down features	No
32	If write-down, write-down trigger(s)	N/A
33	If write-down, full or partial	N/A
34	If write-down, permanent or temporary	N/A

35	If temporary write-down, description of write-up mechanism	N/A
36	Non-compliant transitioned features	No
37	If yes, specify non-compliant features	N/A
38	Link to the full term and conditions of the instrument (signposting)	N/A
